2026 Annual Free Chlorine Maintenance Program Planned March 2-30, 2026

This year Elmo WSC will be participating in the Annual Free Chlorine Maintenance. What does that mean for you: Typically, customers may experience a higher chlorine smell in the water and or discoloration of the water. This may be resolved by running the water in your sink for a few minutes. Elmo WSC will make additional efforts to thoroughly flush all hydrants to help resolve the concerns.

For more helpful ways you as a customer can minimize these unpleasanties as well as a very good explanation of why the maintenance is performed annually to improve overall water quality in the system you can visit <https://www.ntmwd.com/temporary-change-in-disinfectant> or <https://www.tceq.gov/drinkingwater/disinfection/temporary-free-chlorine-conversion>. For any questions, you may call (972) 524-3733.
